

Upcoming City Map and Address Assignment Changes

In November 2025, New York City voters approved a City Charter Amendment to consolidate and digitize the City Map and develop a new citywide system for assigning new addresses and verifying existing addresses.

The Department of City Planning (DCP) is working with the Mayor's Office of Operations and the five Borough President topographical bureaus to implement these measures. DCP will oversee the consolidated map and new address assignment and verification system.

DCP will accept address applications starting January 1, 2027

Until duties are transferred requests should continue to be directed to the relevant Borough President Office topographical bureau according to existing guidelines and policies.

Implementation Timeline

Deadline	Milestone
January 1, 2027	Address assignment and verification functions move from Borough President topographical bureaus to DCP
January 1, 2028	Five borough City Maps are combined into one citywide City Map
January 1, 2029	Digital City Map is implemented
